# Milan Skorić

**Enterprise Architect and Programmer**

Throughout my work experience I have realized that agility and innovative, streamlined solutions are the key to success in the today's highly demanding market.

I have extensive knowledge of industry-standard application architectures, design patterns, and technology standards applied in many different technologies and enterprise environments.

My area of expertise includes developing complex n-tier applications for the financial and banking, e-commerce and software development industries throughout many projects I have done in: C#, .Net, HTML, JavaScript, CSS, Windows Forms, LINQ, Entity Framework, ASP.NET, ADO.NET, T-SQL, MS SQL Server, Web and Rest Services, Azure, TFS, WPF, XAML, XML, XSLT, JQuery, AJAX etc.

As it can be seen from my accomplishments I am extremely dedicated person and absolutely passionate about my profession. That said I am always eager to find job that would help both me and my employer grow. Therefore, if you find me interesting you can contact me to discuss your open position further.

More details about my professional career and engagements can be found at:

In the IT industry more than 15 years. A pioneer of mobile and electronic services for banking in the SEE region. One of the founders of Smartwave whose pervading idea is to use cutting-edge techologies to automate the entire business and make it better and more accessible.

## Most Recent Work Experience

Chief Architect at Smartwave
2014 – Present

My main responsibilities involve: design of the enterprise architecture, framework design, product development management, lifecycle management and technology and product innovation. The product is multi-tier hybrid SaaS platform with Business Process Management (BPM) and Adaptive Case Management (ACM) capabilities available on every smart device as a seamless integration of people, business and things. European Commission awarded Smartwave Digital Business Model for SME with the "Seal of Excellence" within the EU Horizon2020 framework program

Program Manager at Asseco SEE
2006 – 2014

I was responsible for coordination and alignment of product management, development, test and support teams as well as clients and external partners in order to deliver business capabilities for financial services and banking in a rapid development environment. During my thirteen years' experience at this company which started from a junior position I worked with almost all financial institutions in the region. Our products were multi-channel & Internet-based applications created by using Visual Studio .NET suite.
